

Dig Safe. Stay Safe.

It is the law to call 8-1-1 or visit missdig811.org at least three working days before digging — when installing a mailbox, fence, flagpole or planting trees.

This free service will mark underground lines for your safety.

A Natural Gas Upgrade is Coming Soon

See back for actions you may need to take.

Consumers Energy Count on Us®

We'll be working in your neighborhood.

We're upgrading the natural gas system serving you at:
<Service Address>

Project Identification Number:
<PROJECT ID>

Crews will start by identifying underground sewer lines in your area and **may need access INSIDE your home or business** to locate service lines or relocate your meter. Crew members will always carry Consumers Energy identification.

After we mark sewer lines, to avoid property damage, **please mark your underground items** to the best of your ability. Use paint, flags or stakes to mark items such as sprinklers, invisible dog fences, outdoor lighting and drainage lines.

Do not remove any flags or marks on your property until after restoration is complete so that we can safely and more quickly complete the work.

More information will be provided as we get closer to starting construction. We appreciate your patience and understanding while we complete this upgrade.

Contacting Us: Use the project identification number (above) to allow us to better serve your needs.
